### Statement on REACH Compliance

Dear Customers,

We appreciate your interest in the compliance of CRESPO PRINTING GROUP with EU Regulation CE 1907/2600 REACH (Registration, Evaluation, Authorization and Restriction of Chemicals).

The Regulation, stipulates that companies have to register a chemical substance in a central database if they produce this substance in quantities of more than a ton per year or if they intend to import it into the European Community in these quantities.

For registration, a technical file is to be submitted to the REACH agency in Helsinki (ECHA) including details on substances and risk management needs. Requirements depend on annual quantity produced and/or imported.

According to the regulation, a downstream user is any individual or legal entity resident in the European Community who uses chemical substances or combined chemical substances, as part of their industrial or commercial activities. Typical downstream users are companies that manufacture products by using substances or combined chemical substances.

**CRESPO PRINTING GROUP is a downstream user who neither manufactures nor import chemical substances in quantities of more than a ton per year. Therefore is not obliged to perform a registration of substances.**

We hope this statement clarifies our current status regarding this issue. Do not hesitate in contact us if you need any further information.

Yours sincerely,

Alberto Guirado

### Statement on Rohs Compliance

Dear Customers,

We appreciate your interest in the compliance of CRESPO PRINTING GROUP with EU Directive 2015/863/EU (RoHS 2), effective from March 31<sup>th</sup> 2015.

The directive makes reference to maximum concentration in weight of certain substances (Lead 0,1%, Mercury 0,1%, Cadmium 0,1%, Chrome Hexavalent 0,1%, poly-brominated flame retardants PBB and PBDE 0,1%), in electric and electronic devices manufacturing.

As a leading manufacturer of PCBs and membrane keyboards, CRESPO PRINTING GROUP is committed to the protection of the environment; we are sensitive to the problems involving the use of harmful substances.

Hereby we would like to inform you that our manufacturing processes and our manufactured products are free from the substances listed on EU Directive 2015/863/EU (RoHS 2).

Yours sincerely,

Alberto Guirado
